DETAILED ACTION

Page 2

Applicants representative was contacted on August 16, 2006, in an attempt to pass this application to allowance. The prior art cited below was given to the representative at that time for him to contact applicants for the purpose of either explaining why the instant claims read over the prior art, amending the claims or canceling the claims to pass this application to issue. To date, the examiner has not received a return phone call, which has prompted the following office action.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 14-18, 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Inoue et al (6153072).

Inoue et al discloses a platinum-gold alloy electrode used in a sensor. See abstract. The platinum-gold alloy electrode comprises a bulk gold concentration of about 1 wt. % or less based upon the total weight of the PT-Au alloy in the bulk of the electrode, and an exposed surface gold concentration of about 5 wt. % or more, based upon the total weight of the Pt-Au alloy at the surface of the electrode, wherein the surface gold diffuses into the bulk electrode layer. See col. 10, lines 3-7 and col. 12, lines 46-47.

Art Unit: 1746

The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the instant invention was made because even though the Inoue patent does not specifically state that the surface gold extends about 50 to 400 nm into the main electrode layer, it would have been obvious to one of ordinary skill, that the surface layer would extend into the main layer at least about 50 nm as the Inoue patent teaches that the surface layer does diffuse into the main layer. The Inoue patent also teaches the used of heaters. See figure 2.

Allowable Subject Matter

- 3. Claims 1-13 are allowable over the prior art of record.
- 4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach and/or suggest a method of forming an electrode by combining a platinum and gold precursors and forming an electrode ink that is fired to form the electrode and then treating the electrode in an atmosphere having 500 ppm oxygen or less for a time sufficient to produce a surface gold concentration of greater than or equal to 6 times a bulk gold concentration in the electrode.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.

Application/Control Number: 10/626,128 Page 4

Art Unit: 1746

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571 272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
